Millions of people fall ill every year and many die as a result of eating unsafe food. Most of these illnesses are attributed to contaminated food or water. Proper food preparation can prevent most food borne diseases.

This short, auto-marked programme will give you the knowledge you need to understand those health issues surrounding food safety and how to prevent unwanted illnesses.

A great addition to your CV to show your commitment to health and fitness, this programme is also beneficial for general knowledge.

Completed online with auto-marked assessments, this programme can be completed in your own time.

- Place of study: **Learn from home**
- Type of course: **Online distance learning course with no exams**
- Course duration: **An average of 2-3 hours.**

Full customer service support will be provided throughout the course.

There are six parts to the course:

Hygiene

Learners will be introduced to the legal and to the importance of personal hygiene, cleaning and contamination, and helps the learner identify the consequences of poor hygiene and the benefits of good hygiene.

Food poisoning

Learners will be able to identify symptoms of food poisoning and how these symptoms may develop.

Food safety responsibilities

Learners will be introduced to the legal and personal responsibilities towards food safety under the Health and Safety at Work Act.

Reporting illness

Learners will understand which symptoms should be reported and how long before the person can return to handling food after being identified with these symptoms.

Protective clothing and equipment

This will cover the importance of protective clothing and equipment when working with or near food.

Contamination

Learners will understand the precautions that must be taken to prevent the contamination of food and work surfaces.
